**Instructors:** Clint Williams, Jasson Drinkard, Rudy Socorro, Scott Huff  
Polk County Fire Rescue

This course meets or exceeds the requirements for FLUSAR and NFPA 1670, *Standard on Operations and Training for Technical Search and Rescue Incidents*. Vehicle and Machinery Rescue will prepare the student to better identify the hazards associated with vehicle and machinery incidents, necessary to operate effectively and safely. The course will develop skills used in performing extrication from vehicles and machinery, through hands on, practical application. The course will advance their knowledge, skills, and abilities in the use of hand, pneumatic, electric, and hydraulic tools utilized in vehicle and machinery rescue. The course will challenge the student both physically and mentally.

*Students will need full turnout gear, gloves, boots, helmets, and eye protection.*
